

kernel_delay

kernel_event_receive
_timeout

linked_list_transfer
_after

```
graph LR; A[kernel_delay] --> C[linked_list_transfer_after]; B[kernel_event_receive_timeout] --> C;
```

The diagram illustrates a data flow where two separate inputs, 'kernel_delay' and 'kernel_event_receive_timeout', are combined into a single output, 'linked_list_transfer_after'. The inputs are represented by white boxes with black borders, while the output is a gray box with a black border. Blue arrows indicate the direction of the flow from the inputs to the output.
